Interactive comment on "Reviews and syntheses: Methane biogeochemistry in Sundarbans mangrove ecosystem, NE coast" *by* M. K. Dutta and S. K. Mukhopadhyay

M. K. Dutta and S. K. Mukhopadhyay

manabdutta.1987@gmail.com

The affiliation published in the discussion section of the manuscript is as follows:

"Manab Kumar Dutta1*, Sandip Kumar Mukhopadhyay2 1Geoscience Division, Physical Research Laboratory, Ahmedabad - 380009, India 2 Department of Marine Science, University of Calcutta, 35, Ballygunge Circular Road. Kolkata - 700019, West Bengal, India"

The affiliation may lead to understand that the work is done at Geoscience Division, Physical Research Laboratory as well as Department of Marine Science, University of Calcutta. But this is not the fact. The work was done completely when I, the first

author of the manuscript (Manab Kumar Dutta) was at Department of Marine Science, University of Calcutta under the supervision of Dr. Sandip Kumar Mukhopadhyay (second author of the manuscript). But now I am working at Geoscience Division, Physical Research Laboratory. The affiliation of the second author remains same.

So, kindly consider the affiliation as follows:

"Manab Kumar Dutta1,2*, Sandip Kumar Mukhopadhyay1 1Department of Marine Science, University of Calcutta, 35, Ballygunge Circular Road. Kolkata - 700019, West Bengal, India 2 Now at: Geoscience Division, Physical Research Laboratory, Ahmedabad - 380009, India"

I hope now the affiliations are clear. I will make the relevant modification when uploading the files after discussion.
