Dear Professor Kienast, dear referees,

Thank you very much for the helpful comments and suggestion for our manuscript. We can follow most of the arguments of all referees and will thus incorporate almost all suggestions made. In the attached PDF file, we have listed responses to the different points made. There are only a few cases in which we would prefer not to follow the suggestions made, but we offer compromise solutions in most of these cases.

C1

Kind regards also on behalf of the co-authors

Ulrich Kotthoff
