

The new version of the manuscript is much better and clearer with the changes in the text and figures. I have some minor remarks:

- Lines 198 and 427: it must be all in lower case letter for 'photogrammetric'.
- Lines 430-431 are confusing and need to be split into 2 sentences.
- Lines 529-531: the meaning of 'co-variation' is not clear in this sentence.
- Lines 550-552 must be re-written.
