Dear Referee, thank you very much for reviewing our manuscript especially from the technical point of view. There are many valuable proposals, which we will follow and work on it in the next version of our paper. This will surely help to improve our work. However, it seems that we have not well described some issues. So we rephrased them to make the statements clearer. The detailed reply and comments you will find in the attached pdf-document. Best regards, Michael Klinge
