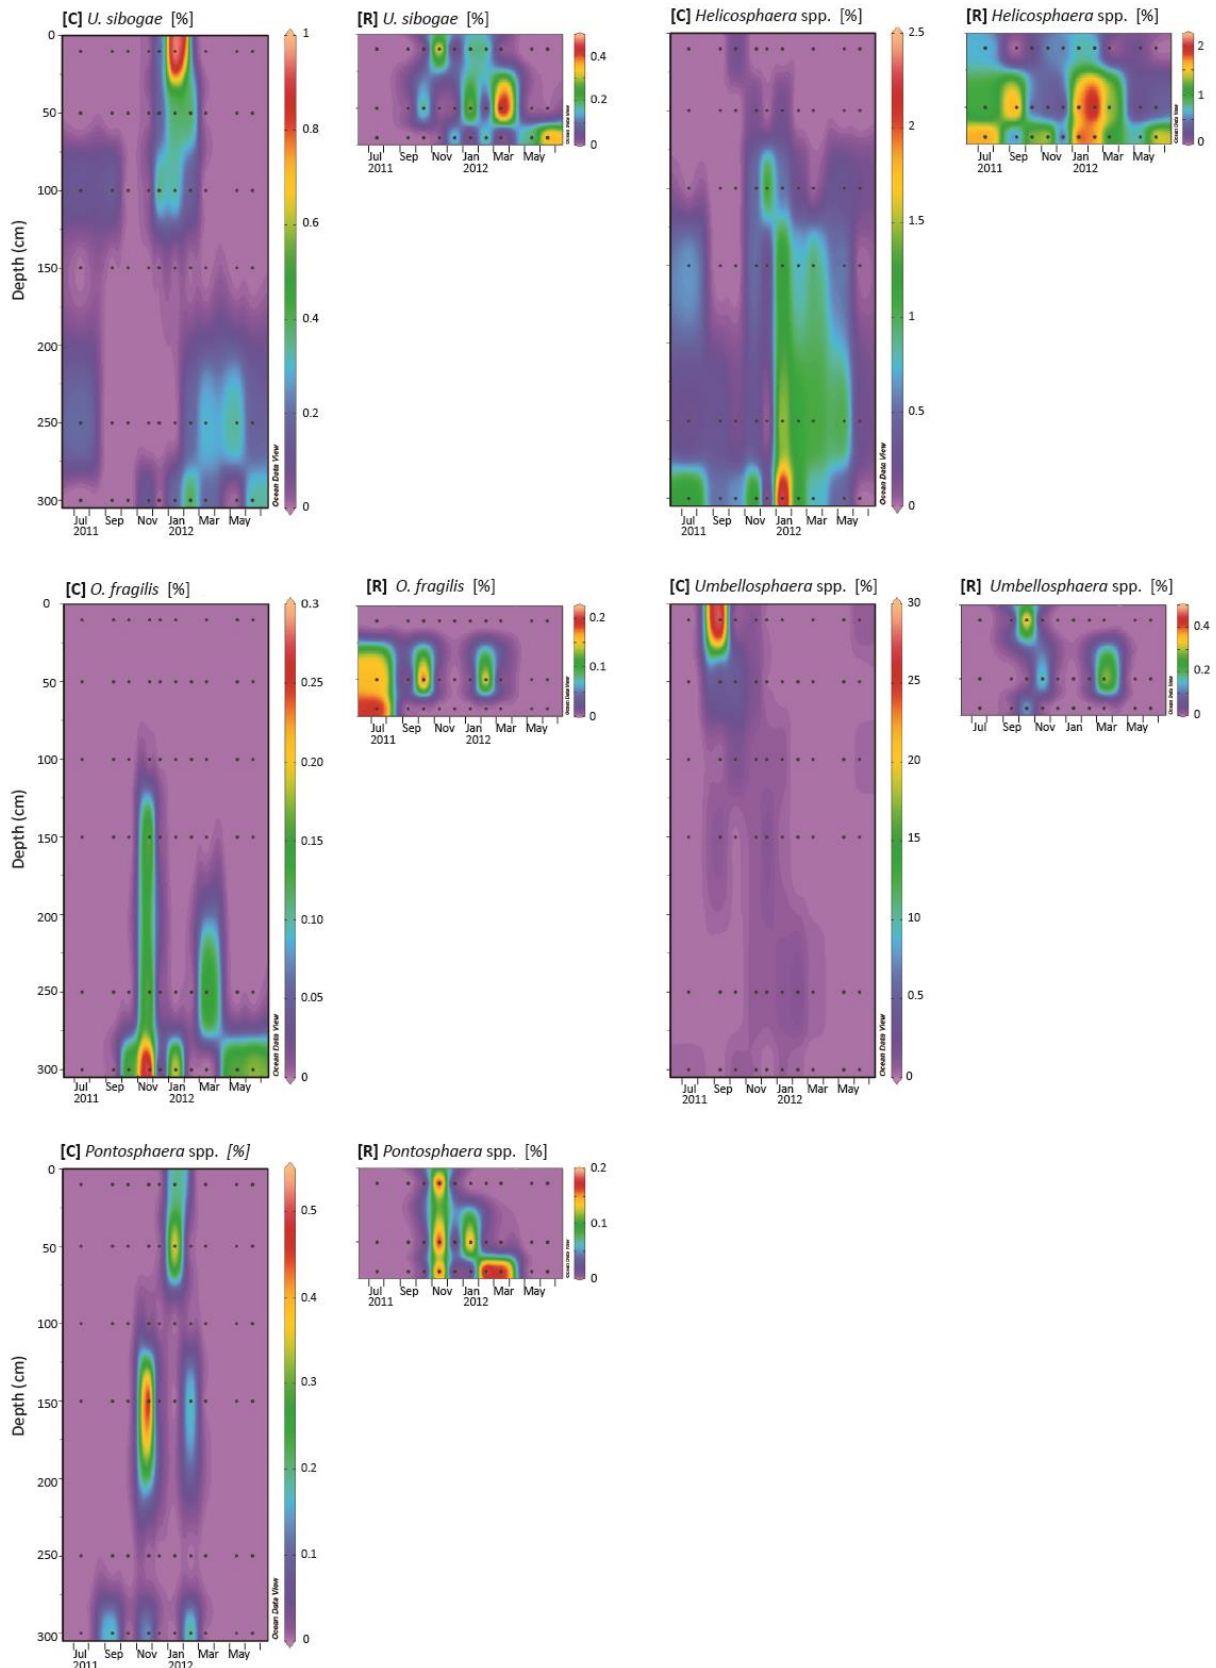
**Figure S1. Temporal and vertical variability of the relative abundance of minor species of coccoliths (%) in CALIBERIA (indicated by [C]) and in RAIA (indicated by [R]) stations. Black dots represent the sampling month and depth. Note that each color bar has been scaled to the maximum and minimum values of its corresponding species.**


**Figure S2. Temporal and vertical variability of the relative abundance of minor species of coccoliths (%) as in Figure S1.**
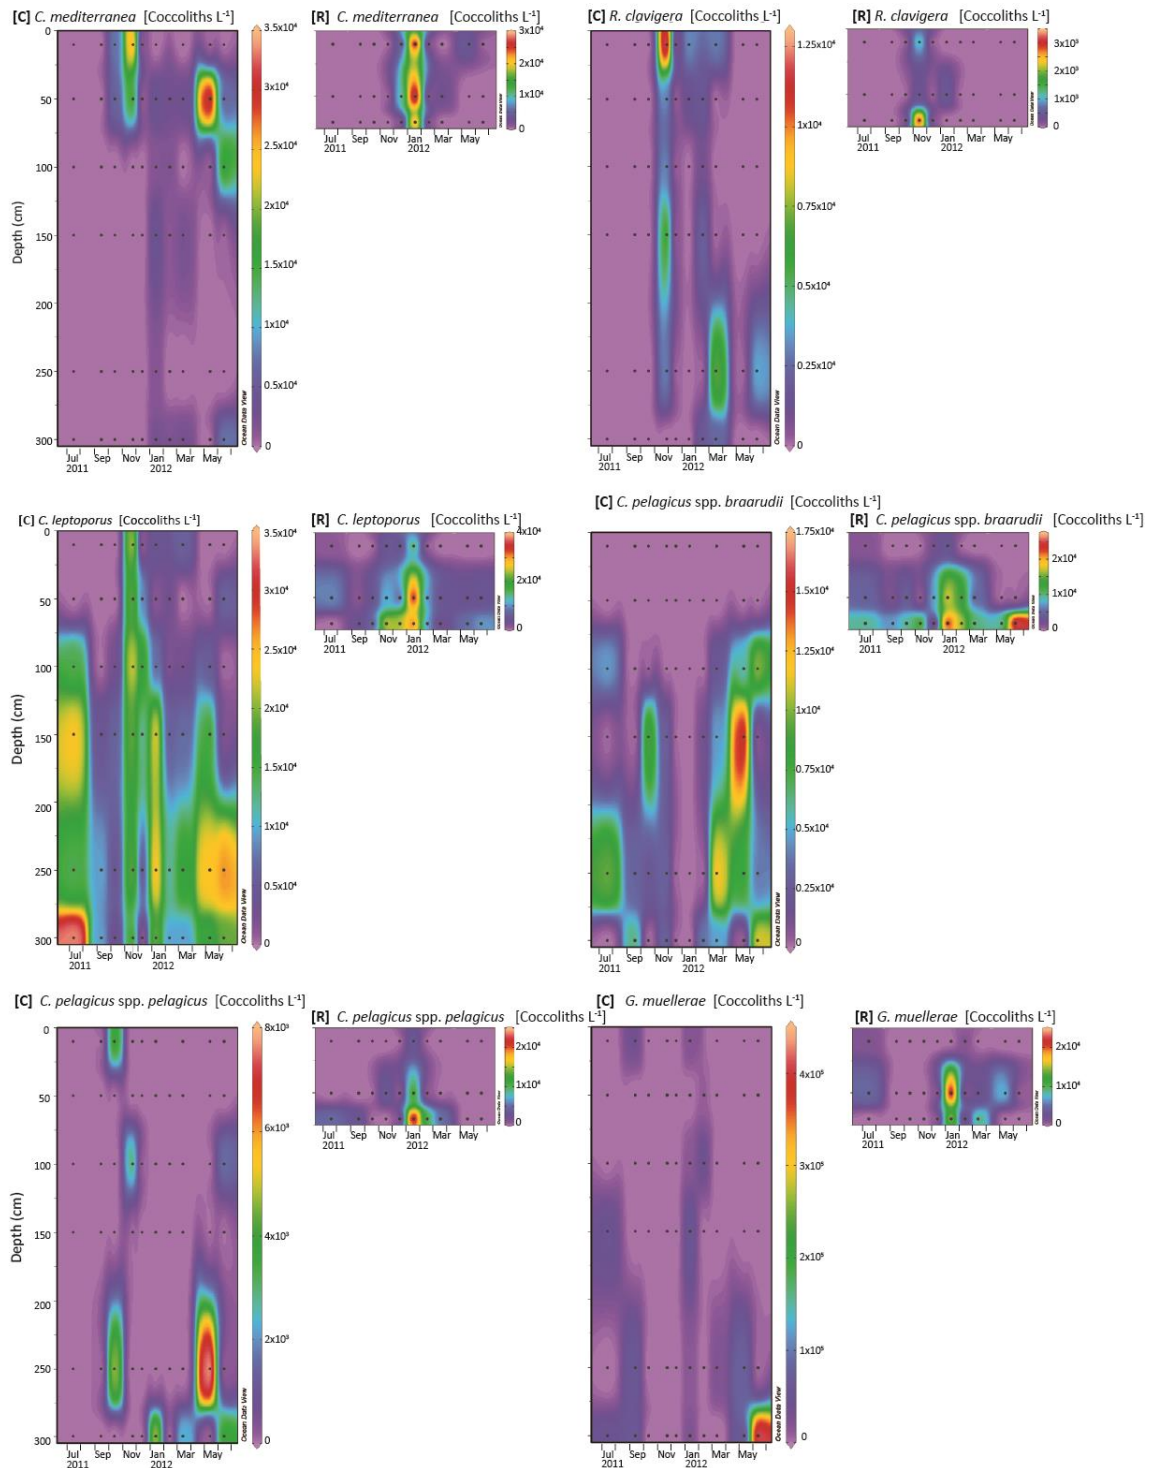

**Figure S3. Temporal and vertical variability of the absolute abundance of minor species of coccoliths (coccoliths L⁻¹) as in Figure S1.**
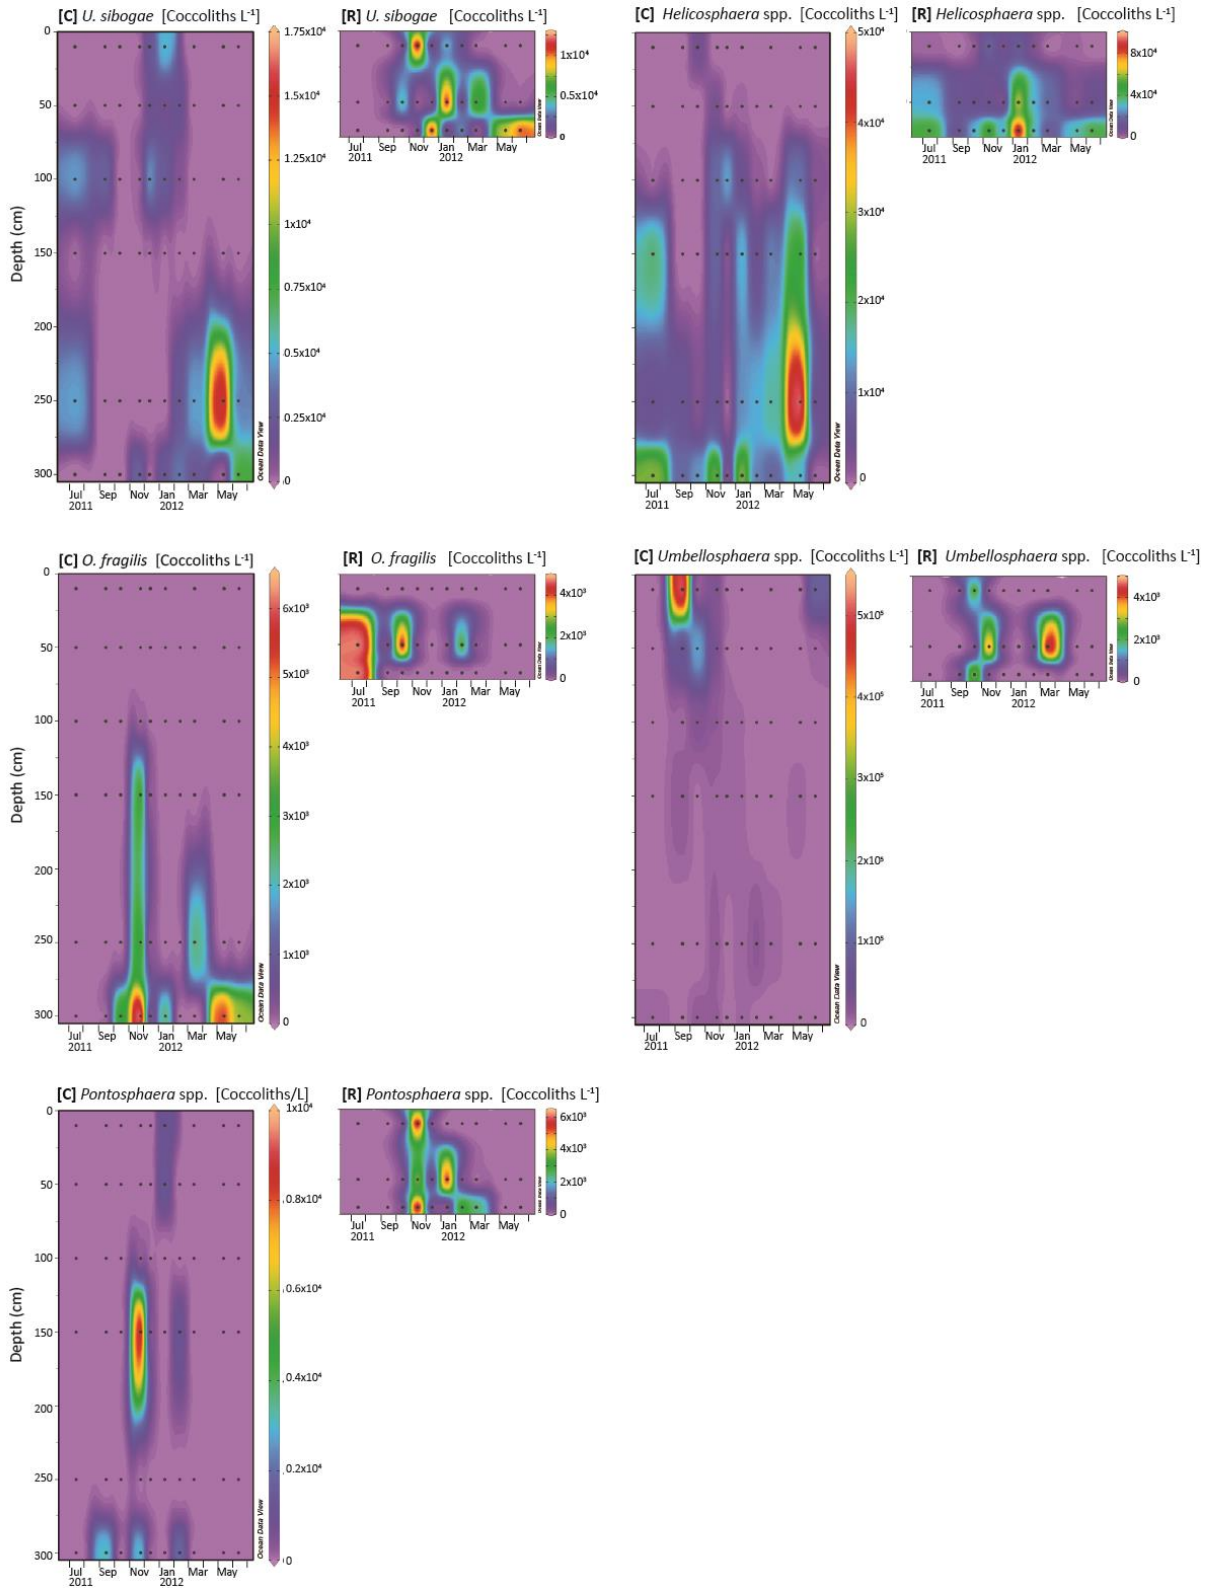

**Figure S4. Temporal and vertical variability of the absolute abundance of minor species of coccoliths (coccoliths L⁻¹) as in Figure S1.**
