

Viçosa, July 4th, 2018

Dear Dr. Jens-Arne Subke,

We are very grateful for all appropriate and constructive suggestions proposed to improve our article made through your editorial work and reviewer collaboration. All the authors received with great enthusiasm and fulfillment the final acceptance of the article entitled "**Modeling rhizosphere carbon and nitrogen cycling in *Eucalyptus* plantation soil**" (Manuscript bg-2017-302) for publication in the journal **Biogeosciences**.

We certificate that the manuscript has not been submitted for publication elsewhere and accordingly all authors contributed to the work described here and take entire responsibility for it. There is also no conflict of interest.

Sincerely yours,

Rafael V. Valadares
