

Interactive comment on “Variable metabolic responses of Skagerrak invertebrates to low O₂ and high CO₂ scenarios” by Aisling Fontanini et al.

Page 3, at line 1 impose and not imposes

[Reply: Change made as suggested.](#)

Page 3, line 12, I suspect that it is sea stars and not sea starts.

[Reply: Change made as suggested.](#)

Page 5, line 33: Please clarify the units of the respiration rate.

[Reply: Change made as suggested, it now reads “DO mg L⁻¹ min⁻¹ g DW⁻¹”.](#)

Table 3: I guess that the units of the respiration rate should be mg O₂ /l/min /gDW as in Figure 1. Please clarify. and "Of" and "not off".
