

Interactive comment on “Also tropical freshwater ostracods show a seasonal life cycle” by Juliane Meyer et al.

Anonymous Referee #2

Received and published: 2 May 2017

The manuscript by Meyer et al. entitled “Also tropical freshwater ostracodes show a seasonal life cycle” presents important information on (sub) tropical ostracode calcification and related environmental information. Presented data and results are novel and will serve in future (sub) tropical paleoenvironmental reconstructions. However, there are important details that need to be improved before. I have carefully read the comments from the other reviewer and I agree with his comments and concerns that authors should carefully and almost completely consider. I therefore, tried to focus on other aspects in order to not be repetitive. I attach a pdf file with my comments and corrections and hope they will help the improvement of this manuscript before its future publication.

Please also note the supplement to this comment:
