Received and published: 16 November 2017

We would like to thank Anonymous Reviewer #1 for their positive assessment of our manuscript. We agree that it was a challenge to communicate these complex results concisely; this was certainly our goal, and we are pleased to hear that the Reviewer thought we succeeded in this regard. We also appreciate the minor editorial comments provided, which clearly demonstrate the reviewer carefully read the manuscript (even the appendix!) These comments will be addressed after the open discussion period concludes and will improve the manuscript for future readers.
