

## ***Interactive comment on “Community composition and seasonal changes of archaea in coarse and fine air particulate matter” by Jörn Wehking et al.***

### **Anonymous Referee #2**

Received and published: 27 February 2018

Interesting study and most of my comments are minor. The cited Smith paper should be cited as they identified archaea in aerosols that had crossed the Pacific. The manuscript does need a careful review for english errors. Mouse over the notes on the pdf to see suggestions on these but there are others

Please also note the supplement to this comment:
