We (the authors) are happy with the comments and the review on the paper this far. They will certainly help us update and clarify the manuscript to make it a better paper. One point that has been raised is the lack of validation and we have made a validation analysis that we upload with this comment. We plan to add it to the paper as an appendix. Responses to comments and the reviews will be posted later. Thank you!

Please also note the supplement to this comment:
