Dear Patricia Grasse,

As requested by Biogeosciences, I need to individually respond to all referee comments (RCs) by posting final author comments on behalf of all co-authors.

Again, thank you for very much for your review and your constructive comments. We are happy to make most of the changes that you suggest. In particular, we will try to incorporate the changes that you suggest for Figure 4 and provide a more detailed discussion, as previously mentioned in our comment during the open discussion part of this review process.

Sincerely, Jill Sutton
