Interactive comment on "Riverine particulate C and N generated at the permafrost thaw front: case study of western Siberian rivers across a 1700-km latitudinal transect" *by* Ivan V. Krickov et al.

Ivan V. Krickov et al.

oleg.pokrovsky@get.omp.eu

We thank Reviewer No 1 for his/her thorough review and useful comments. Please find attached the revised manuscript with all changes highlighted. We added a big deal of new information in the main text of the paper; however we would like to keep technical details in the Supplement.

1   Riverine particulate C and N generated at the permafrost thaw front:

2   case study of western Siberian rivers across a 1700-km latitudinal transect
