

Interactive comment on “Modeling oceanic nitrite concentrations and isotopes using a 3D inverse N cycle model” by Taylor S. Martin et al.

Taylor S. Martin et al.

tmart@stanford.edu

Received and published: 11 December 2018

Page 11, Lines 1-3: The response to this comment was not addressed in the previous response. A mention of oxygen as a field that is not explicitly modeled has been added to the end of Section 2.1 (the N cycle model overview).
