

Authors Response to Associate Editor Comment

Before you MS can be published, Figure 1 must be improved:

This figure is of poor quality and some letters appear in the background (something like "mapsof"). Please redraw to remove these letters. We also need a reference for the lithological map, it can be an published report or an official web site.

Figure 1 was re-drawn and improved the quality of the figure substantially. A reference of the lithological map was given in the caption of this figure (Figure 1). P. 29, L. 912
