

Supplement 1 List of all publications considered in the meta-analysis

- Agbenin, J. O., and Tiessen, H.: Phosphorus forms in particle-size fractions of a toposequence from Northeast Brazil. *Soil Sci Soc Am J*, 59(6), 1687-1693, 1995.
- Guzel, N., and Ibrikci, H.: Distribution and fractionation of soil phosphorus in particle-size separates in soils of Western Turkey. *Commun Soil Sci Plan*, 25(17-18), 2945-2958, 1994.
- Lobe, I., Amelung, W., and Du Preez, C. C.: Losses of carbon and nitrogen with prolonged arable cropping from sandy soils of the South African Highveld. *Eur J Soil Sci*, 52(1), 93-101, 2001.
- Makarov, M. I., Haumaier, L., Zech, W., and Malysheva, T. I.: Organic phosphorus compounds in particle-size fractions of mountain soils in the northwestern Caucasus. *Geoderma*, 118(1-2), 101-114, 2004.
- Rubæk, G. H., Guggenberger, G., Zech, W., and Christensen, B. T.: Organic phosphorus in soil size separates characterized by phosphorus-31 nuclear magnetic resonance and resin extraction. *Soil Sci Soc Am J*, 63(5), 1123-1132, 1999.
- Solomon, D., and Lehman, N.: Loss of phosphorus from soil in semi-arid northern Tanzania as a result of cropping: evidence from sequential extraction and ^{31}P -NMR spectroscopy. *Eur J Soil Sci*, 51(4), 699-708, 2000.
- Solomon, D., Lehmann, J., and Zech, W.: Land use effects on soil organic matter properties of chromic luvisols in semi-arid northern Tanzania: carbon, nitrogen, lignin and carbohydrates. *Agric Ecosyst Environ*, 78(3), 203-213, 2000.
- Solomon, D., Lehmann, J., Mamo, T., Fritzsche, F., and Zech, W.: Phosphorus forms and dynamics as influenced by land use changes in the sub-humid Ethiopian highlands. *Geoderma*, 105(1-2), 21-48, 2002.
- Syers, J. K., Shah, R., and Walker, T. W.: Fractionation of phosphorus in two alluvial soils and particle-size separates. *Soil Science*, 108(4), 283-289, 1969.
- Tiessen, H. J. W. B., Stewart, J. W. B., and Moir, J. O.: Changes in organic and inorganic phosphorus composition of two grassland soils and their particle size fractions during 60–90 years of cultivation. *J Soil Sci*, 34(4), 815-823, 1983.
- Uriyo, A. P., Singh, B. R., and Kesseba, A.: Forms of Phosphorus in the Separates of Three Tanzanian Soils Belonging to Mollisol, Alfisol and Oxisol Orders. *E Afr Agr Forestry J*, 43(2), 120-123, 1977.
- Von Sperber, C., Stallforth, R., Du Preez, C., and Amelung, W.: Changes in soil phosphorus pools during prolonged arable cropping in semiarid grasslands. *Eur J Soil Sci*, 68(4), 462-471, 2017.
- Williams, E. G., and Saunders, W. M. H.: Distribution of phosphorus in profiles and particle-size fractions of some Scottish soils. *Eur J Soil Sci*, 7(1), 90-109, 1956.

Supplement 3 Table S1 and Table S2 Regression models

Table S1 Intercepts and slopes of (multiple) linear regression models calculated for total organic C (TOC), total organic P (TOP), total inorganic P (TIP), and organic carbon (OC), organic phosphorus (OP) and inorganic phosphorus (IP) concentrations of the three particle size fractions as a function of latitude (Lat), mean annual temperature (MAT) and mean annual precipitation (MAP), either alone or in combination. Note that intercepts and slopes are only given for the significant regressions (>0.05). No star stands for >0.05 , * stands for 0.05, ** stands for 0.01, and *** stands for 0.001.
