We thank the reviewer for their comments and efforts in reviewing our manuscript. Virtually all their comments are useful and straightforward to deal with in a revised manuscript. We do however acknowledge the suggestion by the reviewer in responding to Reviewer 1 which we will do. Clearly, the reviewer recognises value in our methods and our metrics but a little additional clarity in the explanation is recognised in responding to reviewer 1. In summary, this is a useful review and we will respond thoroughly in a properly revised manuscript.
