

Figure S1. Correlations between (a) SUVA₂₅₄ and HIX, (b) between $S_{275-295}$ and estimated %DOC, (c) between $S_{275-295}$ and HIX, (d) between C5/C1 Fmax ratio and HIX. Correlations in panel (a), (c), (d) were calculated as Pearson's correlation while correlation in panel (b) was calculated as Spearman's rank correlation.
