Dear editors of the Biogeosciences

Revision for “Multiyear methane ebullition measurements from water and bare peat surfaces of a patterned boreal bog” (manuscript no. bg-2018-532).

We want to thank the two Referees for their constructive comments that certainly improved the report. Accordingly, we have revised our manuscript following the suggestions made by the Referee #1 and the Referee #2, or replied in detail why we have not followed their guidelines in some places. In the supplement you will find the original

C1

statements of the referees and our responses to them.

We hope that the editors and the Referees find the quality of our revised manuscript sufficient to warrant publication in the Biogeosciences. We thank the Associate Editor and the Referees for their valuable and constructive comments.

On behalf of co-authors, Sincerely yours,

Elisa Männistö
