Submission of the revised article “**Biogeochemical evidence for anaerobic methane oxidation at active submarine mud volcanoes on the Canadian Beaufort Sea slope**” by Lee et al.

Incheon, October 30 2018

Dear associate editor Zhongjun Jia,

We sincerely thank you for providing us an opportunity to revise this article (ID: bg-2018-91). Please find the revised version of the article. We revised the text as you suggested, after uploading the revised tables and figures in the journal website as required before. The references were also up-dated in the revised version. The changed parts of the text were highlighted by blue color.

We hope our article will be considered positively for publication in Biogeosciences.

Yours sincerely,

Jung-Hyun Kim
