22 January 2020

Dear Prof. Dr. Jack Middelburg,

My co-authors and I are delighted that our original research article entitled “Impact of small-scale disturbances on geochemical conditions, biogeochemical processes and element fluxes in surface sediments of the eastern Clarion-Clipperton Zone, Pacific Ocean” has been accepted for publication in the Special Issue “Assessing environmental impacts of deep-sea mining – revisiting decade-old benthic disturbances in Pacific nodule areas” of *Biogeosciences*.

We have performed all required technical corrections and are most thankful for your time and consideration.

Yours sincerely,

Jessica Volz
