

Interactive comment on “Relationships between leaf $\delta^{15}\text{N}$ and leaf metallic nutrients” by Chongjuan Chen et al.

Anonymous Referee #1

Received and published: 27 December 2019

The manuscript reported large amount of valuable data. The result and discussion are generally reliable and reasonable. However, please check all the data carefully. For example, in Table S5, r value for $\delta^{15}\text{N}$ vs pH is in bold font but its p value is larger than 0.05.
