

Interactive comment on “Scaling carbon fluxes from eddy covariance sites to globe: Synthesis and evaluation of the FLUXCOM approach” by Martin Jung et al.

Martin Jung et al.

mjung@bgc-jena.mpg.de

Received and published: 29 January 2020

We will carefully revise and improve all relevant figures according to the reviewers suggestion.

We have included the Baldocchi et al. 2001 reference in the first sentence of the introduction in the revised manuscript as we had missed this reference.
