Received and published: 13 March 2020

We have created a pdf file containing all referee comments and our responses to them. Some of the answers were written quite a while ago, so there may be some overlap. Hopefully the answers are satisfactory as they are. Unfortunately I am not able to attach the answers here, because the portal does not seem to allow a large pdf supplement. I've sent the pdf to the copernicus office (and the editor) and hopefully they will upload the file here (I'm trying to avoid copy-pasting the answers here, because that would remove all styles etc. and mean more work).

kind regards and many thanks to the referees for their comments
