

## ***Interactive comment on “Reviews and syntheses: Anthropogenically breaking macro-ecospatial “chains”? – case review of HU Line” by Yi Lin and Martin Herold***

**Anonymous Referee #1**

Received and published: 11 December 2019

The authors state that they used meta-analysis and remote sensing data but there is no section describing how they did that. I did not see any results compatible with the meta-analysis approach. English needs some improvement (there are typos).
