

Figure S1: (a, c) Freshwater discharge and NO_x flux of the Mississippi River and (b, d) Atchafalaya River. The measurements for the period of 1997-2017 (grey x) and the monthly mean values (grey lines) are shown and the 2017 data are highlighted as red dots.

Data are from the USGS webpage (<http://waterdata.usgs.gov/nwis/qw>): station 07373420 Mississippi River at St. Francisville

5 (30°45'30" N, 91°23'45" W) and station 07381495 Atchafalaya River at Melville (30°41'26" N, 91°44'10" W).

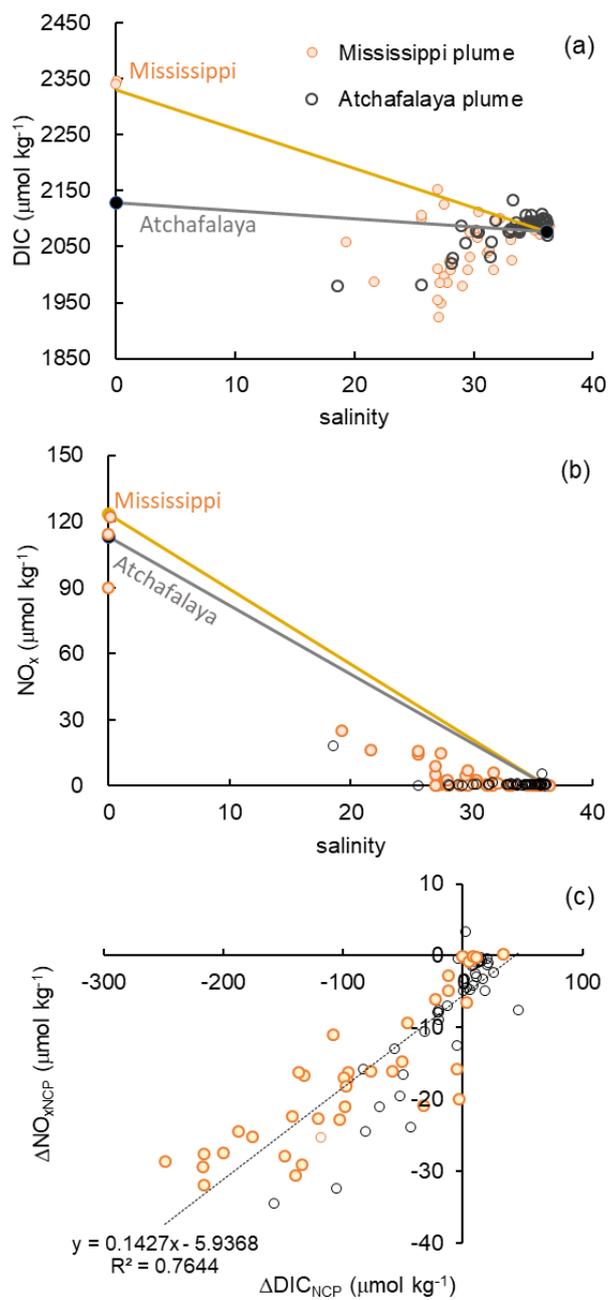

Figure S2: The scatter plots of (a) DIC and salinity, (b) NO_x and salinity and (c) $\Delta\text{DIC}_{\text{biol}}$ and $\Delta\text{NO}_{x,\text{biol}}$ in the Mississippi and Atchafalaya plume. The end member concentrations of the Mississippi river, the Atchafalaya river and gulf water are shown in panels a and b as well as the conservative mixing lines.
