

***Interactive comment on “Sample preservation and pre-treatment in stable isotope analysis: Implications for the study of aquatic food webs” by Marc Jürgen Silberberger et al.***

**Anonymous Referee #2**

Received and published: 13 July 2020

The authors of this study are making efforts to adapt the original manuscript to the reviewers' comments, especially regarding Mixing models. The responses provided to my comments on the former review comments seem to be satisfactory. For that reason, I look forward to review a much-improved and refocused new version of the manuscript.
