

Interactive comment on “Impact of dust enrichment on Mediterranean plankton communities under present and future conditions of pH and temperature: an experimental overview” by Frédéric Gazeau et al.

Anonymous Referee #2

Received and published: 14 December 2020

Dear authors,

Although I am far from an expert on the topic that you present in your manuscript, I decided to have a critical look at your manuscript since it turned out to be very difficult to find colleagues willing and able to assess your work. Also, the first reviewer did an excellent job by writing a very detailed comment on your manuscript. Frankly, I was impressed by the quality of your manuscript and I only have a few minor suggestions and questions, for which I refer to the annotated manuscript.
