Received and published: 28 August 2020

This is a very interesting study. A related study on the impact of central pacific El Nino and canonical El Nino on carbon fluxes are published in Valsala, V., M. Roxy, K. Ashok, and R. Murtugudde, Spatio-temporal characteristics of seasonal to multidecadal variability of pCO₂ and air-sea CO₂ fluxes in the equatorial Pacific Ocean, 2014, Journal of Geophysical Research, 119, DOI:10.1002/2014JC010212, 8987-9012 may be kindly cited. Both these studies share a common scientific subject (impacts of CP and EP El Nino in the carbon cycle), therefore it is appropriate to mention above study in this paper as well.

Thanks, -Vinu
