

***Interactive comment on “Arctic aquatic graminoid tundra responses to nutrient availability” by Christian G. Andresen and Vanessa L. Lougheed***

**Michael Weintraub (Editor)**

michael.weintraub@utoledo.edu

Received and published: 1 February 2021

While only one of the seventeen potential reviewers I nominated completed a formal review, it appears that we have now received sufficient feedback with the short comments provided by Jeremy May and Sergey Loyko. Thus, I will request that Biogeosciences proceed and we can close the discussion once all author responses are posted (I would be grateful if you would provide a response to Sergey Loyko before we close the review).

Best wishes, Mike Weintraub Associate Editor
