Dear Gerald Jurasinski,

Thank you very much for your comments and suggestions. We added a chart to the supplements and some information in the main text to make the timing of the different measurements clearer. We rewrote the conclusions sections entirely, removed excessive summary elements and added information on the impact of our study in a broader context. We feel that these changes and the minor editing changes improved our manuscript considerably. Please refer to the supplement to this comment for our detailed replies to your general and line comments.

C1

On behalf of all authors,

David Holl
