This paper investigating very important problem about role of animals in functioning of cryoconite hole's ecosystems. Thank you for your work.

I would like to get your attention to more precisely distinguish occurrences of primary producers on different glaciers.

Currently, it is not clear whether e.g. *Ancydonema* sp. exist on the all glaciers or only in the Ebbabreen or Svenbreen.

This informations can be very useful in the situation of preparing meta-analysis in the

C1

future.
