Received and published: 17 May 2020

We would like to sincerely thank the referees for their sharp criticism. There is no doubt that their thorough review of the paper increased its quality. On the other hand, the amount of work needed to carefully respond to each one of their comments has made us submit this response later than we would have wanted to. We apologize for the delay.

The responses to both referees may be found in the attached document.

Please also note the supplement to this comment:
