7
8 **Fig. S1** | Air temperature (T_{air}) measured 2 m above the ground surface: (a), (b), (c),
9 and (d) are half-hourly mean values in spring, summer, autumn, and winter,
10 respectively; (e) Seasonal and inter-annual variation in daily average T_{air} from late 2014
11 to late 2018.

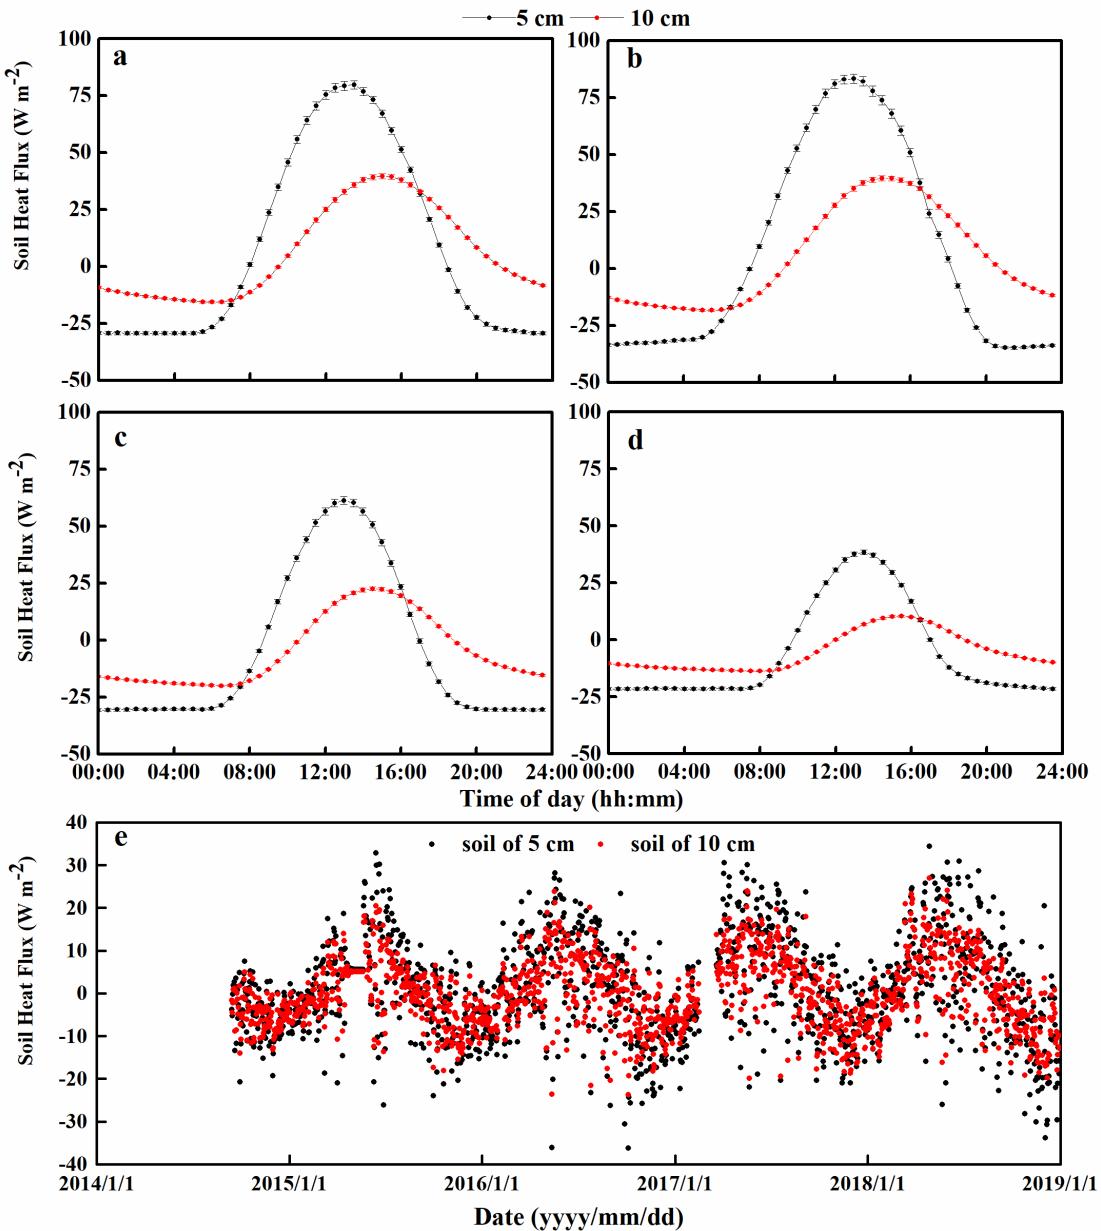

12

13 **Fig. S2** | Net radiation (R_n) measured 2 m above the ground surface: (a), (b), (c), and

14 (d) are half - hourly mean values in spring, summer, autumn, and winter, respectively;

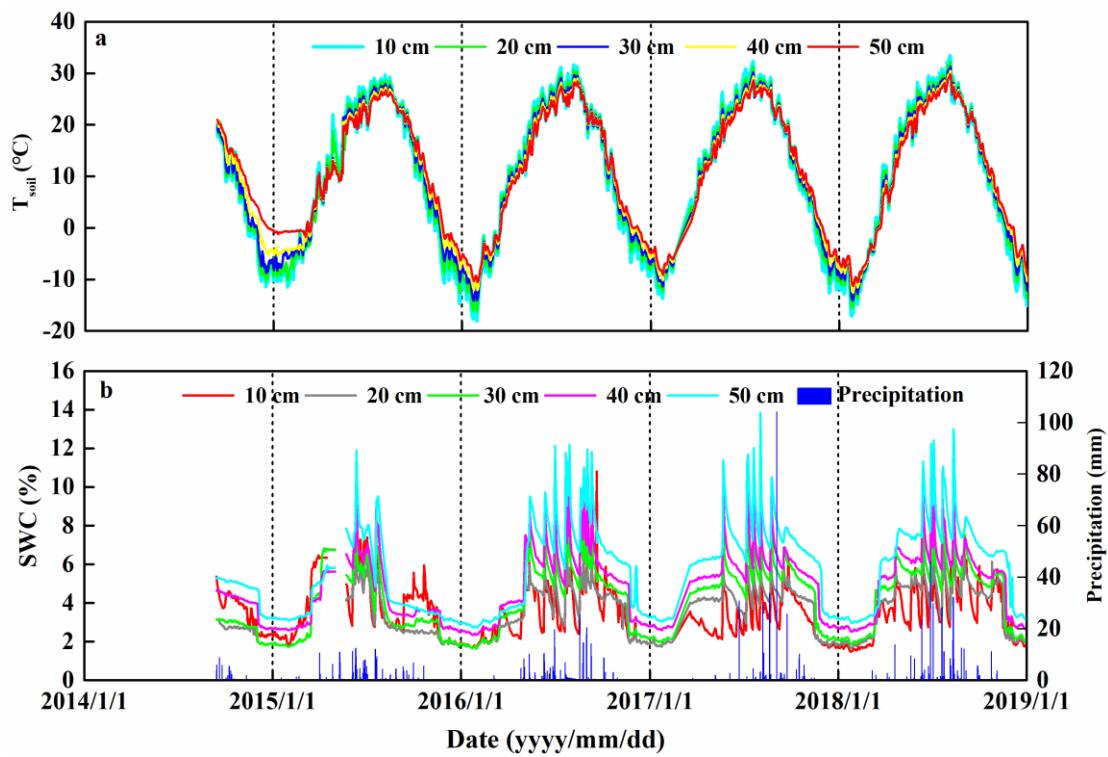

15 (e) Seasonal and inter-annual variation in daily average R_n from late 2014 to late 2018.

16

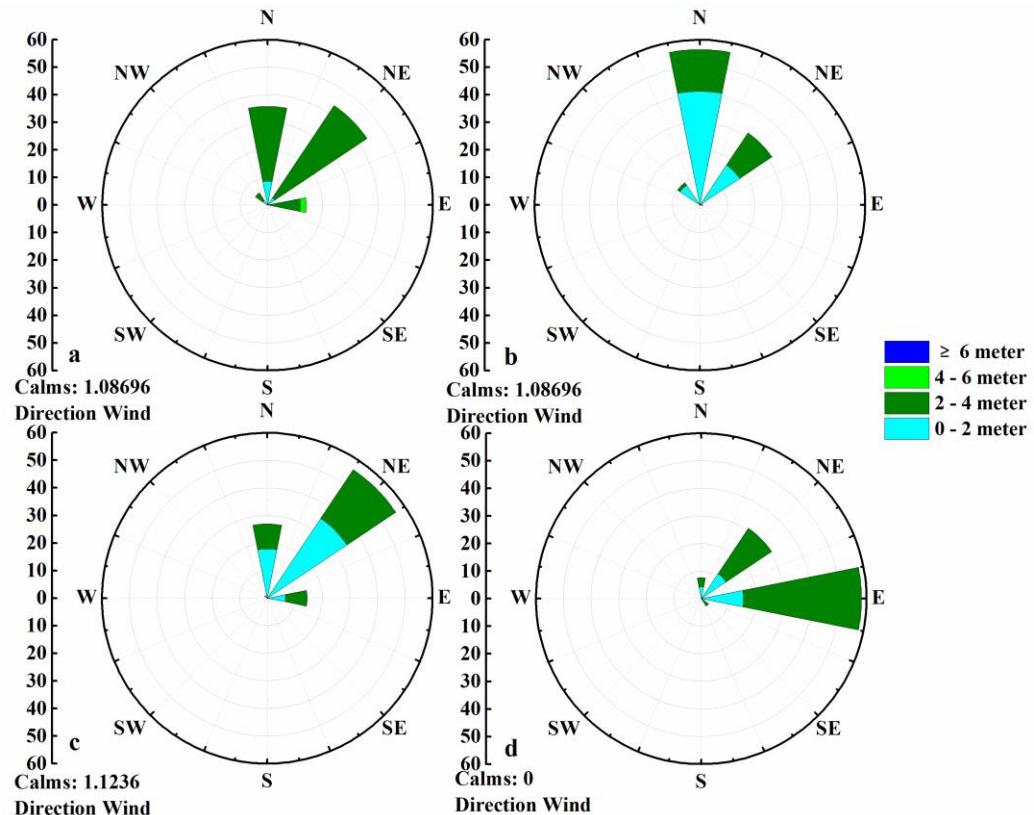

17

18 **Fig. S3** | Soil heat flux (SHF) at depths of 5 cm and 10 cm: (a), (b), (c), and (d) are
 19 half – hourly mean values in spring, summer, autumn, and winter, respectively; (e)
 20 Seasonal and inter-annual variation in daily average SHF at depths of 5 cm and 10 cm
 21 from late 2014 to late 2018.
 22

23

24 **Fig. S4 | (a)** Seasonal and inter-annual variation in daily average soil temperature (T_{soil})
 25 and (b) soil water content (SWC) at depths of 10, 20, 30, 40, and 50 cm, and seasonal
 26 and inter-annual variation in daily precipitation from late 2014 to late 2018.

27

28 **Fig. S5** | Diurnal mean wind speeds and directions between 2015 and 2018: (a) spring,
 29 (b) summer, (c) autumn, and (d) winter. Note that the wind direction means the direction
 30 the wind blows *from*.

31 **Table S1** | Seasonal-scale correlations (Pearson's r) between net ecosystem exchange (r_{NEE}), gross primary productivity (r_{GPP}), and ecosystem
 32 respiration (r_{Rec}) and the key environmental factors. N represents the sample size. Abbreviations: SWC, soil water content; T_{soil} , soil temperature.
 33 **, $p < 0.01$; *, $p < 0.05$.
