

The authors have addressed the comments adequately.

Just a note, when I asked if the you looked for other data, I meant in actual papers and not in a database. There are many folks who do not submit their data to the PMEL database, but still publish their work.

Section 2.3 - thank you for correcting the k values. Did the you change the Sc according to ambient conditions before computing the fluxes?

*Yes, this was accounted for within the k parametrization derived by Goddijn-Murphy et al. (2012).*
