

January 20, 2022.
Uppsala, Sweden.

Dear Hiroshi Kitazato,

Thank you once again for considering our manuscript for publication. The reviewers have raised some interesting points which have helped us better explain some points in the revised version of the manuscript.

As you requested, we have also added some more information about the importance of sample size to the introduction, so that the reader understands why we look at different sample size scenarios.

For your convenience, we also attach a “track changes” version of the manuscript.

Kind regards,

Bryan Lougheed
