

Authors response file upload

We thank the editor for his acceptance of the manuscript and the outstanding communication during the review-phase. The long review process has been difficult as a young first-author, but thankfully the editor gave us the opportunity to respond to all reviewer concerns – and invested much time to evaluate the discussion.

Changes in the final manuscript and supplement:

- Supplement material was re-numbered as requested by Polina Shvedko.
- We checked the orders of authors in the manuscript and MS records and found that these are identical (as requested by Polina Shvedko).
- We deleted an error in line 469. We refer only to harvest statistics in the supplements, not NEE.
