

Figure RC1-1. Nineteen sample moving average SST_{SAT} (green spheres) and nineteen sample moving integrated production temperatures for SST_{SAT} (IPT_{SAT}, blue upward triangles) and for SST_{LDI} (IPT_{LDI}, orange diamonds), both based on the LDI diol fluxes and the respective SST records. Samples with LDI outliers (values < 17°C) are included except for the upper graph of IPT_{LDI} (red downward pointing triangles). For reference, the LDI dot flux is included as well.
