

Dear editorial team,

thank you for your work!

Following the editor's suggestion, we replaced "men" with "humans" in the first sentence of the introduction.

In addition, we fixed the following very minor issues:

- one broken referencing to a picture reading "???" instead of the correct figure number
- "my suffice" ==> may suffice
- adjusted acknowledgments to symbols that were used in Figure 1 of the first version of the manuscript in the acknowledgment section (the original Figure 1 was deleted during revision but is now reused as what you term "key figure")
- added an acknowledgment to our anonymous reviewers and the editor in the acknowledgment section

Kind regards,

Heiner on behalf of the authors.
