Dear Editorial Support Team,

Attached you find the manuscript with figures better adapted for color blindness: in problematic figures (according to www.color-blindness.com/coblis-color-blindness-simulator/) I have adjusted the color scheme and, where appropriate, modified as well line styles to improve identifiability.

5 Concerning footnotes, I removed many of them either by inserting them in the text or by deleting them altogether. You will note, however, that some footnotes remain: unfortunately those I found too relevant to delete, but also not fitting the main text without disrupting it, so that I kindly ask to keep those as such.

Thank you.

With best regards,

10   Guilherme L. Torres Mendonça
