Grenoble, 14 August 2023

Dear Editor,

I am very pleased to submit the new revised version of the manuscript entitled “*Above-treeline ecosystems facing drought: lessons from the European 2022 summer heatwave*”.

As recommended, I attempted to revise the figure legends, by including more links between them and by adding more context. I hope this has improved their readability.

Please note that the text has been edited by a B. Z. Carlson, a former PhD student of mine, who is a native from the U.S.A.

Yours sincerely,

Philippe Choler
